

PRESS RELEASE  
FOR IMMEDIATE RELEASE:

HI-TECH ENGINEERING MOVES TO LARGER FACILITY in Grand Rapids, Michigan, May 29, 2008 -- Hi-Tech Engineering, Inc. announced that it will relocate its corporate headquarters and manufacturing from a 20,000 square foot facility to a more spacious 50,000 square foot building in Grand Rapids', Oak Industrial Park. The Company's growth in sales, engineering and development has necessitated the move to a larger facility. The new building will feature a new test lab for customer trials, a manufacturing area more than double in size and improved office space. "This is an exciting time for our company," said VP Engineering Otto Huiber. "The additional space will allow us to continue to grow our company with an increased focus on product innovation. It will also enable us to manufacture and ship our equipment faster and more efficiently to better support our growing number of customers."

Hi-Tech Engineering's new address is 2450 Oak Industrial Drive, MI 49505. The general telephone number (616) 957-4030, the general fax number (616) 957-4148 and email addresses will remain the same.

About Hi-Tech Engineering:

Since 1984, Hi-Tech has been actively engaged in designing and manufacturing quality reaction injection molding equipment that will fit your product and your process. Located in Grand Rapids, Mich., our staff of over 40 employees has a passion to meet and exceed the needs of its customers by providing them with rugged equipment uniquely suited to their end product requirements. Hi-Tech backs that up with innovative engineering, skilled manufacturing, and knowledgeable technical support staff.

The company can be found on the web at [www.hitechengineering.com](http://www.hitechengineering.com), or may be reached at (800) 968-9801.
